SUMMARY

Dedicated and results-driven Web Developer with 3+ years of experience in WordPress, PHP, JavaScript, jQuery, CSS, and SQL, now expanding expertise into full-stack development with the MERN stack and Next.js. Recently completed a comprehensive MERN course on Udemy, strengthening skills in building scalable web applications, APIs, and modern front-end interfaces. Known for strong problem-solving abilities, attention to detail, and the ability to quickly learn and adapt to new technologies. Passionate about writing clean, efficient code and delivering high-quality solutions.

EXPERIENCE

- **Futurio Solutions** — Jodhpur, India
  Web Developer — *Jun 2022 - Sep 2025*
  - **Roles and Responsibilities**: My role involves creating responsive and user-friendly websites while ensuring scalability, performance, and security through careful planning and testing.
  - **Developing web applications**: HTML, CSS, JavaScript, WordPress, PHP.
  - **Work on a API**: Creating a Rest API for web application.
  - **Testing**: Contribute to testing processes, including unit testing and integration testing, to maintain code reliability.
  - **Debugging and Troubleshooting**: Identify and resolve bugs, issues, and performance bottlenecks through effective debugging and troubleshooting.

PROJECTS

- **Blog Manager in React (React, Tailwind, Appwrite, Redux, Router, Vercel)**: Created blog manager with Appwrite and React framework. Includes user-specific blog management, login/signup, and CRUD operations for blog post.

- **Address Book with Redux Toolkit (React, MongoDB + Mongoose, JWT, Bcryptjs, Express, Tailwind, Axios, Redux Toolkit, Vercel)**: A complete Address Book web application built using React, Redux Toolkit, Node.js, Express, and MongoDB. Includes JWT authentication, user-specific address management, login/signup, change password, and CRUD operations for addresses.

- **Todo List with Context API (React, MongoDB + Mongoose, JWT, Bcryptjs, Express, Tailwind, Axios, Context API, Vercel)**: A full-stack MERN Todo App with user authentication, JWT-based login system, Context API state management, and user-specific todos with add, edit, delete, and complete features.

- **GoPray Plugin - wordpress.org (WordPress, PHP, JavaScript, jQuery, MySQL, AJAX)**: Developed a custom WordPress plugin based on client requirements, allowing users to submit prayer requests, which are displayed on a prayer wall after admin approval. Integrated features like user interactions (likes/comments), admin moderation, and performance optimization.

- **BrewScanner.ae (PHP, cURL, WordPress, WooCommerce, REST API, JSON)**: Implemented a PHP cURL function to fetch product prices and availability from various ecommerce sites. This functionality enables users to compare prices across multiple platforms and purchase products at the best available price.

- **HouseManage.co.uk (WordPress, Elementor, PHP, CSS, JavaScript, Figma)**: Designed and developed a complete website using Elementor, following a Figma-based UI/UX reference. Implemented custom styling, responsive layouts, and dynamic content management to enhance user experience.
